EXPERIENCE

Modern Campus

May 2022–Present

Software Development Team Lead Apr 2023–Present

Started as Senior Software Developer · Joined May 2022

- Lead a team of six FTEs and four contractors supporting Catalogs (programs, courses etc) for 850+ higher education clients and Curriculum change management addon.
- Coordinate issue triage, delegation, regular Scrum meetings, documentation, and release and deployment preparation; contribute directly to development and QA as needed.
- Maintain and improve the reliability of an established product while a separate team develops its next generation replacement.
- Example work includes major modernization projects, including a PHP 7 to 8 upgrade, a substantial UI/UX refresh, and migration of a microservice from Python 2 to Python 3.10.
- Support ongoing security updates and maintenance across a stack including Python, PHP, Docker, and Kubernetes.
- Use Playwright for automated UI testing and Codex in day to day development workflows.

AggregateIQ

Feb 2017–Apr 2022

Software Developer Victoria, BC

- Developed web applications, data analytics tools, and ecommerce integrations for issue advocacy and corporate consulting projects.
- Worked across Python, React, PHP, and Elixir, as well as a (very) wide range of client specific tech stacks.

DDB Canada

Sep 2016–Jan 2017

Senior Backend Developer Vancouver, BC

- Contributed to client projects for Destination Canada, BCLC, and Tourism Nova Scotia.
- Built with PHP and Laravel, MySQL, VueJS, Craft CMS, and Drupal, using Forge and Vagrant based development environments.

Sycle

Feb 2015–Aug 2016

PHP Developer Vancouver, BC

- Developed and maintained practice management software for audiology clinics.
- Upgraded the Sycle NOAH Sync frontend for audiometry test results to AngularJS and D3.js; promoted to Lead Developer for the product.
- Worked with PHP, Laravel, MySQL, Doctrine, and domain driven design.

Discover Books

Aug 2011–Jan 2015

PHP/MySQL Developer Abbotsford, BC

- Part of a seven person dev team maintaining a custom ERP built on a LAMP stack hosted on AWS.
- Designed, tested, and released software for used book receiving, inventory, sales, fulfillment, and repricing.
- Automated reporting of key business metrics for the executive team.

Indian and Northern Affairs Canada

2008

Web Developer · University of Victoria co op Yellowknife, NWT

- Updated government web pages to meet revised common look and feel standards.
